Coin & Currency Counters by Semacon

The S-1400 Series Bank Grade Currency Counters are intended for use in high volume environments such as banks, credit unions, casinos and large retailers. They feature an intuitively designed control panel including a 10 digit keypad for batching along with buttons for commonly used features making these counters easy to operate in a variety of applications.

The S-1100 Series High Speed Currency Counters are intended for use in mid-volume applications. Designed for operator convenience, the intuitive control panel features a 10 digit keypad for batching along with buttons for commonly used features.

Semacon S-100 Series Coin Counters feature simple adjustments for setting the coin's diameter and thickness with presets for all US coins (other coin size presets available).

S-45 Electric or Manual Coin Counter / Offsorter / Bagger / Verifier / Packager with batching feature for packaging coins into coin wrappers. Offsorter sorting feature capable of separating the largest diameter coins from smaller diameter coins. For portable or stationary applications. Available in 110 volt or 220 volt.

The Semacon S-500 Series Heavy Duty Mixed Coin Sorter and Value Counter offers intelligent cash management for all five U.S. coin denominations in a durable compact design. Fast, Efficient, Easy to Use.

For more information on all Semacon Products visit our website

Shinwoo SB-1000

The [Shinwoo SB1000](#) not only counts bills, but also knows the difference between denominations of bills. It is a mixed bills counter. This helps set the SB1000 apart from other bill counters. It uses two exit trays, one for standard bills and another for "rejected" bills (such as counterfeit money). If a counterfeit bill is detected, it will be placed in the "rejected" bills tray. This allows the counter to continue counting money efficiently and effectively without having to be shut down. An LCD display is easy to read and makes the machine easy to set up.

Optional Accessory

IDP-3550 Impact Printer (Serial)

Magner Series Currency Counters

Magner 35-3

A compact premium Currency Counter designed for outstanding performance in basic currency processing applications. It offers simplicity of operation and a host of standard features such as selectable speeds up to 1500 notes per minute, automatic start, variable batching, accumulation mode and full error detection.

Magner 35-10

The Model 35 was designed for basic counting and simplicity of operation. It's the number one selling currency counter world wide and features counting at 1,300 documents per minute, touch sensitive controls, variable presets and grand total accumulation.

Magner 75

The 75 Series Currency Counters offer performance and productivity over a wide range of applications. Choose from a basic model with variable batching or a more advanced model with dual head, dual threshold magnetic counterfeit detection or ultraviolet detection, or both in combination based on 3-D size detection.

Also comes with Magnetic Detection for fraud identification

Coin & Currency Counters by Billcon

Billcon N Series Currency Counter

With the Billcon N-Series you can increase your company's productivity, and get the ease-of-use, product reliability, and superior aftersales support that's made Billcon a success in over 70 countries worldwide

Billcon D-551 Currency Discriminator Counter

The Billcon D-551 Currency Discrimination Counter allows operators to be more efficient and cost-effective, they spend less time counting and more time helping customers.

Denomination Recognition at 1,200 Notes-Per-Minute!

CHS-10 High-Speed Coin Counter A Blazing 4,000 Coins-Per-Minute

Counting coins is a task that is time-consuming and must be error-free. Billcon's new high speed CHS-10 coin counter processes high volume of coins at a rate of 4,000 per minute (dime) for accurate, rapid and efficient coin counting. The smaller size coins are rejected into a reject box, while larger size coins remain in the hopper. For operators, the CHS-10 is extremely easy to use, simplifying their work. The body of this desktop model has a low design, so it is easy to place a large quantity of heavy coins into the hopper. All controls are located on the front of the machine to make operation more convenient.

The CCS-65 Coin Counter-Sorter Counts and Sorts at 450 Coins-Per-Minute!

KEEP IT SIMPLE is an axiom our CCS-65 series was built by. The CCS-65 series feature simple mechanisms for easy operation and maintenance, yet, they are also able to sort 450 coins per minute. They also offer advanced features such as push button function for quick access to selected and gross coin totals, and a photo sensor system for enhanced counting accuracy.

Don't see it on this page, if Billcon makes it, we can get it. Parts, Repair and maintenance services available for all Coin & Currency Products.
